

1. Downloading and Installing ReportAssist (Mac)

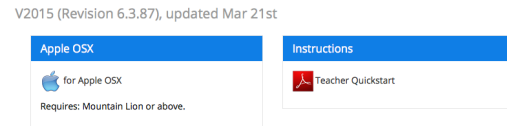

1. To download the program, using Safari visit our web site **reportassist.com**

1.

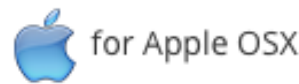

2. Click on the download tab and double click on the for apple button in the middle of the page.

2.

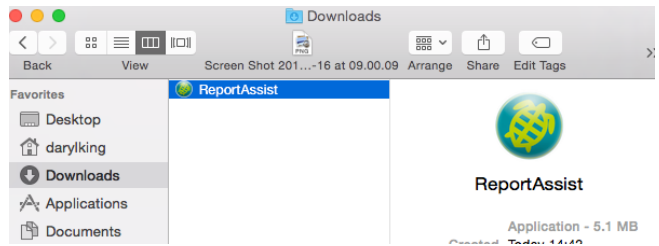

3. Now in Finder select Downloads and double click on the ReportAssist icon

3.

4. Most Mac computers will allow you to open the program at this point.

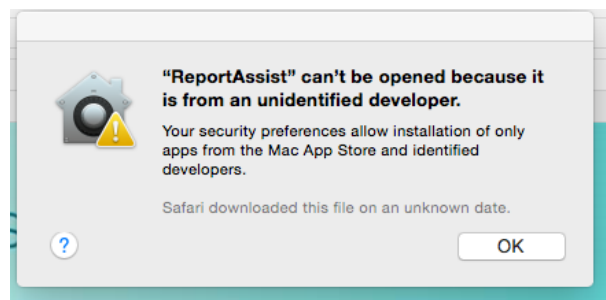

However if your security settings are set to high you may see the warning that it is an unidentified developer.

5. If you see this warning press CTRL on your keyboard whilst double-clicking the icon (screen 5 over-page).

4

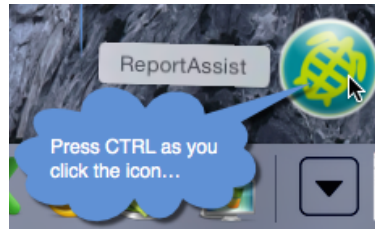

6. Now click the 'Open' button (screen 6).

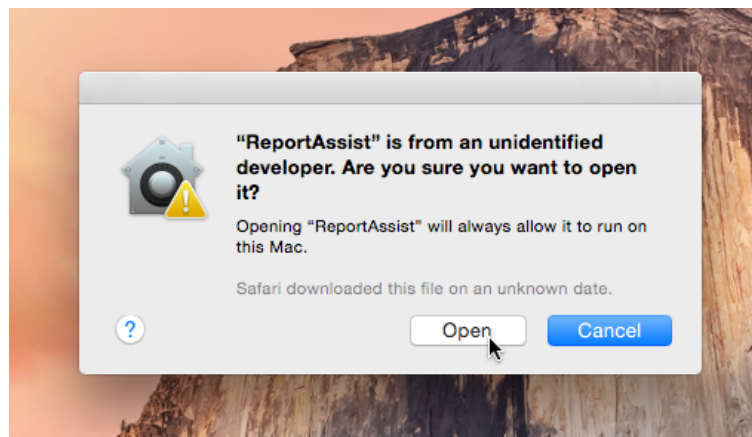

7. Alternatively you can go to you Macs settings and in 'Security & Privacy' set it to allow apps downloaded from 'Anywhere' (screen 7)

8. Once you have installed the program please see the next tutorial on getting started

5.

6.
